

Transform  
surfaces and  
furniture into  
loudspeakers

# INTUBLU

Do you love music and good design? Do you attach importance to a well-designed room concept and would prefer not to spoil the look with a loudspeaker that doesn't fit in?

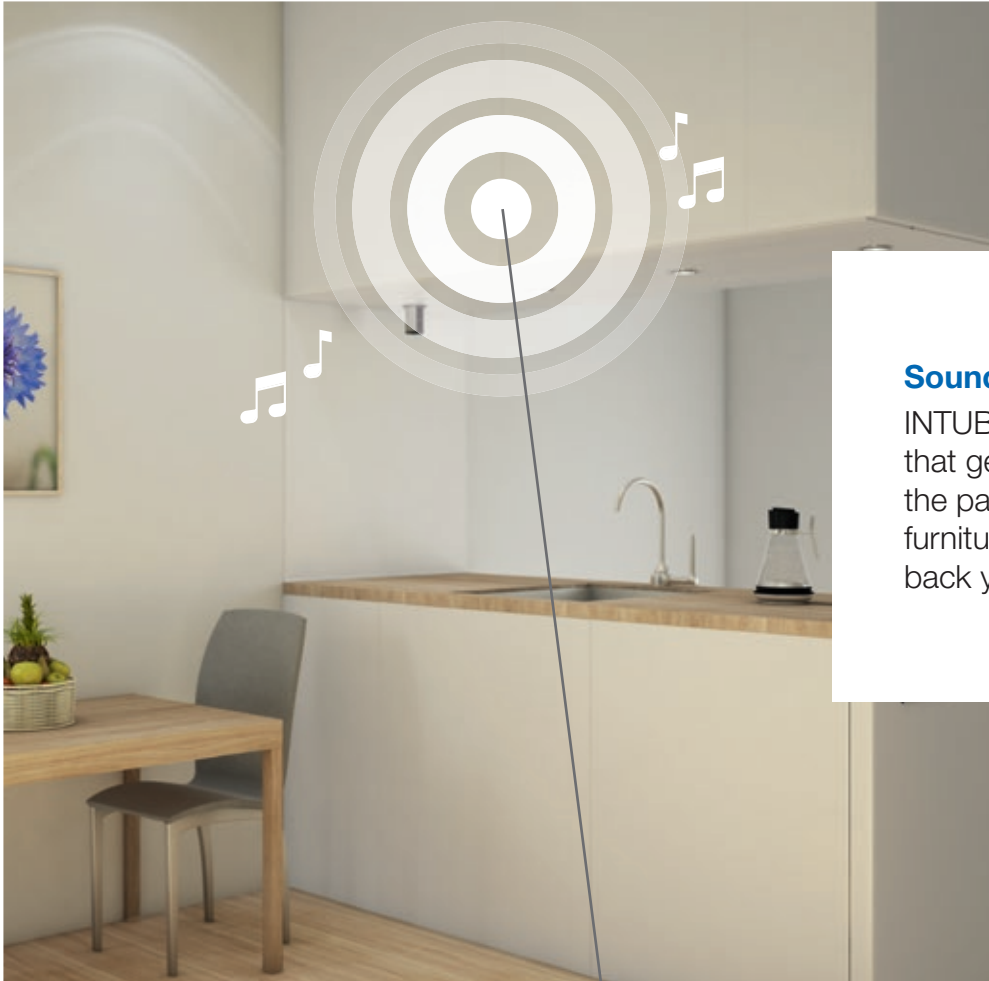

INTUBLU makes loudspeakers that spoil your room look and get in the way a thing of the past, because from now on, furniture and surfaces will play back your hit list.

INTUBLU consists of two structure-borne sound converters and a Bluetooth mains adapter. Mount everything in the place of your choice – concealed inside cabinets, kitchen drawers or behind your bathroom mirror, pair with your mobile phone or other devices via Bluetooth to immediately enjoy your music in top sound quality. The surface vibration achieved by INTUBLU lets you make the most of existing furniture and forget about the design and loudspeaker cables getting in the way.

## BENEFITS

- **Technology and design united to the highest standard**
- **The best sound quality**
- **Space-saving design**
- **No wires or loudspeakers visible**
- **Easy installation**

**BACH  
MANN**  
We power your life.

### **Sounds good, doesn't it?**

944,000	<p><b>1 x Bluetooth mains adapter:</b> Supply cable: 1.5m H03VVH2-F 2x0,75mm<sup>2</sup> with Euro plug   110-230V~ 50/60Hz   2 screw points   Audio outputs: 2x 10W (mono/stereo)</p> <p><b>2 x structure-borne sound converters:</b> 2.0m PVC connecting cable each with device system plug   3 screw points   Voltage value: 30V   Adhesive surface on the back side   Can be mounted using screws or adhesive</p>

## Control INTUBLU via Bluetooth using your smartphone or tablet

Connect your mobile phone or other mobile device via Bluetooth and you can immediately enjoy music in the best sound quality.

### Your favourite hits in the best sound quality

Place INTUBLU in the ideal position on your piece of furniture using the associated **positioning aid**.

#### It's this easy:

1. Select the number of structure-borne sound converters
2. Enter the dimensions of your piece of furniture
3. And the perfect position for your structure-borne sound converters is determined immediately
