OCHNO Systems

OCHNO empowers the user-friendly meeting room. Users can switch between their own devices and the permanently installed conference system, share media content seamlessly and charge their devices at the same time. Just one cable necessary!

OCHNO is designed for ease of use with a plug & play concept and can be installed in any meeting room: One cable is needed for connecting to the end device, for example a user's laptop. An elegant socket in the tabletop (including LED button) secures the connection to the hub below the table and is used for switching the device. Special feature: The hub establishes a connection to every device, regardless of manufacturer and operating system. Sharing and charging included. The system also features all of the advantages of USB-C (100-W charging, USB 2.0 and USB 3.1, a DisplayPort and Alt Mode).

At the same time, it is not just possible to share content. OCHNO also makes it possible to integrate communication platforms (e.g. Microsoft Teams and Zoom) in various integration levels.

OCHNO: An easy-to-install system that eliminates the need for drivers, apps, or an overwhelming number of different interfaces and cables – welcome to the smart meeting room!
BENEFITS

- USB-C plug & play concept
- BYOD & video conferencing system
- No drivers, apps, or tangled cables
- All the advantages of USB-C
- Scalable, for up to 16 users per room

BACH MANN

We power your life.

Power Conference

- Basic unit
- 4 x USB-C connections
- 1 x HDMI connection
- 2 x USB-A for external hardware
